

SCHOOL LA SCUOLA

Professor Vivaldi passionately believes that the purpose of education is to allow students to creatively express themselves. To this end, he comes up with all sorts of crazy ways to enliven his history class so that the students will pass their final exams. On the other side, is Sperone, a dour disciplinarian who inspires fear in all who encounter him. Vivaldi is romantically interested in the comely physics teacher Majello, but apparently she and Sperone are having a hot affair. On the final day of the school year, the situation comes to a rapid boil as Majello has had a major fight with her husband.
