

SONS OF THE WIND HIJOS DEL VIENTO

Sons of the wind is a story of love and adventure, set against the epic background of the conquest of Mexico by the Spaniards. The superstitious Emperor has driven his people to extreme fanaticism. They are firm believers in the supernatural, and offer constant human sacrifices to Gods that are absolutely revered. Kind Nezahualt (powerful subject of Emperor Montezuma) fights against the excesses of such society, in an effort to impose some semblance of rationale.
